Summary

Passionate Web Developer who's actively learning JavaScript-based Web Development via the internet since October 2020. Currently mastering front-end, specifically, React/Redux & CSS, and diving into the back-end with Node.js and MongoDB for databases. At the moment, I'm looking for an entry-level web developer position in a company where i can use my educational background to advance my tech skills.

Experience

Front-End Projects
2020-2021

- **Github Profiles**

  Web Application of which the landing page represents the most popular users on GitHub. All the other users are searchable and have their profiles with some public info about them. I fetched GitHub Rest API and used React Router to complete this project.

- **Quiz App**

  An entertaining game of general education that is completely user modified. Test questions are received by fetching Trivia API.

- **Pomodoro Timer + Tasks**

  Timer web application, which uses the Pomodoro Technique. App also has the "Tasks" section where users can make a to-do list, choose one task as a current and do the productive work with the timer!

- **Drum Machine**

  Electronic musical instrument for playing hip hop, house or metal melody & drum kits. Audio is triggered by clicking drum-pad or pressing a specific key on the keyboard.

- **Portfolio**

freeCodeCamp Certifications
2020-2021

- **Front-End Libraries**

- **JavaScript Algorithms And Data Structures**

- **Responsive Web Design**
